Go to the Security tab and check:

Type of VPN: as -PPTP (Point to Point Tunneling Protocol).

Data encryption: optional encryption)connect even if no encryption.

Check Allow these protocols

Check Unencryped password (PAP).

Check Challenge Handshake Authentication Protocol (CHAP).

Check Microsoft CHAP version 2 (MS-CHAP v2).

Then Click Yes.

VPN Connection Properties		
General Options Security Metworking Sharing		
Type of VPN: Point to Point Tunneling Protocol (PPTP)		
Data encryption: Optional encryption (connect even if no encryption)		
Authentication O Use Extensible Authentication Protocol (EAP)		
Allow these protocols		
 ✓ Unencrypted password (PAP) ✓ Challenge Handshake Authentication Protocol (CHAP) ✓ Microsoft CHAP Version 2 (MS-CHAP v2) 		
password (and domain, if any)		
OK Cancel		

A message like the following wil apear: Click "yes

Connection

Connect to the VPN you have configured by selecting it in Network Connections

In the window that opens, the user name and password should appear, mark Save this username and password for the following users and select **Me only, and click on connect.**

🦉 Conr	nect NetFreeAnyWhere - ישראל
<u>U</u> ser name:	test
Password:	[To change the saved password, click here]
Do <u>m</u> ain:	
✓ Save this u	ser name and password for the following users:
Me only Anyone	who uses this computer
Connect	Cancel Properties <u>H</u> elp

You will be connected and authenticated against the VPN server, and then the connection should work.
